

This information is being published at the request of the Hawaii Department of Human Services, Med-QUEST Division.

Health Management Associates (HMA) is excited to work with you and your colleagues as the state of Hawaii works to transform the substance misuse system. With your support, identifying substance misuse early, preventing worsening and providing interventions and treatment can become standard practice within your organization and across the state. HMA, in partnership with Med-QUEST, is inviting you and your team to join us for monthly **office (half) hour sessions for all things Screening, Brief Intervention, and Referral to Treatment (SBIRT).**

HMA will be available to answer questions about implementing SBIRT in your clinical setting—workflows, billing and coding, referral pathways, screening tools, addressing stigma around SUD, diagnostic questions—essentially anything related to SBIRT! We look forward to the opportunity to open our virtual office doors to anyone who may have questions or need clarification on SBIRT in Hawai'i. Our team will be available **Nov. 15 and Dec 13, 2023, at 12 p.m. HST.**

Please use the link below to join our session and feel free to share with others who may be interested.
