

Vital Medication Program

A new program to eliminate out-of-pocket costs on preferred insulins and other vital drugs

UnitedHealthcare is taking an important step in its continued efforts to make prescription drugs more affordable by eliminating out-of-pocket costs for drugs that are critical to maintaining the health of our commercial members.

UnitedHealthcare's Vital Medication Program will begin offering the preferred drugs listed below at \$0 cost share for patients who are members of plans that offer this program on certain plan-specific dates throughout 2023:

- Insulins – rapid, short and long-acting
- Epinephrine – allergic reactions
- Glucagon – hypoglycemia
- Naloxone – opioid overuse
- Albuterol – asthma

What does this mean for your patients with UnitedHealthcare Employer & Individual benefits?

There may be no out-of-pocket cost or a copay or deductible for patients with active primary UnitedHealthcare Employer & Individual benefits. Patients are encouraged to sign in to their **myuhc.com** account to find the program drug list for details.

How can Providers help?

- Review the full list of qualifying drugs on the next page.
- For qualifying patients who are on similar, more expensive medications, consider switching them to one of these no-cost options.

Go to uhcprovider.com to access the provider portal for member and plan-specific information on coverage and start dates, or call the provider service line at 1-888-842-3210.
